- 4. Expansion of Local Community Redevelopment Area (CRA). Motion to approve the acceptance of Warranty Deed for property donation to the City of Lake Butler by the Whitehead Family which is the site of the original Union County Jail.
  Mr. Maines stated that this is two items into one. The issue of the Warranty Deed is one and we are in discussion with the Whitehead family now and the ball is in their court because we are waiting for the information the City Manager has requested so the deed part of it will not be applicable. However, the expansion of the CRA is fair game. You can have an expansion of the CRA regardless of the donation and we can have the donation regardless of the expansion of the CRA, so really, they are two different issues. Mr. Maines stated he knows it has been presented as a tie in, but they are really not tied in to one another. So that is all the Commission should consider this evening is the expansion. We will discuss the deed later after we get the details worked out.

A motion to approve the CRA Expansion was made by Vice Mayor Hendrix. Motion seconded by Commissioner Redman. Unanimous approval. Motion carried.

5. Resolution No. 2024-03. The City of Lake Butler will adopt by Ordinance local zoning for historic property designation and protection.

#### **Historical Significance**

The Holding Cell was built circa late 1880s. Prisoners were temporarily incarcerated at this facility with no heat or water before being transported to court proceedings. It was located in a region of the State that was originally St. John's County but was later divided into Alachua, Union, Bradford, and Baker Counties. An iron ring for connecting the chains of prisoners is still visible and mounted on the west interior brick wall. The Holding Cell is older than the incorporation of Lake Butler in 1893 and the founding of Union County in 1921. Over its life span it has undergone no alterations or modifications with little

property or building upkeep. This structure is located on a corner lot and will be donated from private property by owner concurrence to the City of Lake Butler in summer 2024.

The current Union County Jail is located on the north-side of the courthouse at 50 NW 1st Street in Lake Butler. Historically, it was the first jail facility for Union County constructed circa 1922. In 1950, it was dismantled.

Municipal potable water and sanitary sewer hook-ups are available at the subject property. Also, electrical outlets are currently on-site. Please refer to Optional Materials for more information.

#### Indicate Current Use of Historic Property and Proposed Use

The Lake Butler Community Redevelopment Area (CRA) has been expanded this year to include the Historic Holding Cell for preservation and access for public use. Except for the subject structure the site is undeveloped yet ideally located near the City's Main Street and is planned as a new park for the City. Lake Butler will make submissions with the Florida Recreation Devolvement Assistance Program (FRDAP), among other sources, for development of the park to include restrooms, parking, and other amenities. #### **Annual Visitation**

The Historic Holding cell is one city block north of US Highway 100 (the main Street in the City). Lake Butler is a destination as the county seat and is the largest city in Union County. The subject site is near the Palatka-Lake Butler State Trail and a few blocks south of the Lake Butler water body. Potentially, the Historic Holding Cell is exposed to 12,500 daily traffic in Lake Butler.

#### **Basis of Visitation Estimates**

According to the Florida Department of Transportation (FDOT) Traffic Count Station (#39010000) there are 7,000 Average Annual Daily Traffic (AADT) at East Main Street and Southwest 4<sup>th</sup> Street, and 5,500 AADT (#39050000) at West Main Street and Southwest 6<sup>th</sup> Avenue. Both locations are less than a city block from the Historic Holding Cell. Please refer to the Lake Butler /FDOT 2023 Traffic Count Map (Optional Materials) for additional information

#### **Education Benefits and Public Awareness**

The Historic Holding Cell will have displays of the project restoration and of the new park itself. Current and future generations will be exposed to the historical significance of local rail service and the support of public awareness posted on the Town's website.

#### **Anticipated Economic Impact**

As the City's new public park, the site is expected to increase sales of refreshments, fuel, and other commercial business for local merchants. School field trips would have an additional economic impact.

#### Benefit to Minorities and Disabled

Educational signs are planned for the site that are lowered and angled for visitors at wheelchair heights. Future development plans will include sidewalks and braille inscriptions.

Mr. Eric Case Historic Preservation Grants Specialist Bureau of Historic Preservation 4th Floor, R.A. Gray Building 500 South Bronough Street Tallahassee, Florida 32399-0250

Dear Mr. Case:

I am pleased to offer my support for the City of Lake Butler's application for a grant through the Department of State's Historic Preservation Grants Program. The City has applied for funding for planned renovations to protect and preserve the Historic Holding Cell which is estimated to be more than 144 years of age. The Historic Holding Cell was once used to temporarily house inmates before being transported to court proceedings. The structure is located on a parcel of land in Lake Butler which was recently donated to the City.

As a State Senator representing several fiscally constrained communities in North Florida, I know how important historic preservation funds are to ensure the continued restoration and preservation of precious historic sites and facilities. I am pleased to join my House colleague, Representative Chuck Brannan, in support of this very worthy project.

Please feel free to contact me or my staff if you have any questions regarding this unique and historically significant project.

Sincerely,

Jennifer Bradley

#### Historic Union County Jail Holding Cell: Preservation & Accessible Improvements

Proposed Work and Anticipated Funding Needs

470 NW 1st Street, Lake Butler, FL 32054

Located one block North of the main intersection of Lake Butler's W Main St (Hwy 100) and SW 6<sup>th</sup> Ave is an approximately 500 sf brick masonry holding cell. This structure is a remnant of the late 1800's Union County's historic jail. Covered in vegetation, this structure requires restoration and is recommended to have site improvements to provide accessible access to the structure as well as outdoor interpretive displays installed to contribute to the education of the public of local Lake Butler history.

#### **Design & Planning Services**

Architectural and Site Planning services are recommended for this historic resource to work with the city in confirming the intended interpretive function of the holding cell. This would include meeting with city staff, reviewing relevant historical data/ resources the city may have and the performance of a building physical condition assessment. The review of historical data is for the purpose of gaining an understanding of the building's original use and design in order best recommend work that is authentic to its historic origins.

Following the investigative tasks, the design consultants will proceed to confirm the scope of work with the city and assist in determining what expertise are needed to address the design objectives. Design expertise anticipated include Architectural consultation and depending on the determined scope of the project, additional expertise needed could include Structural Engineering, Plumbing Engineering, Electrical Engineering, Civil Engineering, Landscape Design, Planning, Exhibit Design and Cultural Heritage Specialist Review.

#### Preliminary Proposed Scope of Work and Design

(The following proposed work is based on photographs of the holding cell and will need to be re-evaluated as part of the investigative stage of the design process previously described.)

The following proposed scope of work is divided into "critical work" and "recommended enhancements". Critical work includes maintenance concerns and stabilizing the building to ensure perpetuity.

Recommended enhancements include improvements to the building and site that provide greater access to the public, as well as, increasing the resource's ability to convey its sense of time, history and contribution to the identity & character of the local community.

#### Critical Work

The recommended level of intervention for the Holding Cell structure is preservation and a limited amount of restoration work as defined by the Secretary of the Interiors Standards for the Treatment of Historic Properties.

Preservation work is described as activities to "... protect, stabilize, on-going maintenance and repair of historic materials", as well as, "retention of greatest amount of historic fabric along with the buildings historic form".

Restoration work recommended entails, "... removal of features from other periods in its history and reconstruction of missing pieces from the restoration period." There are no recommendations for reconstruction at this time other than repairs and/or replacement for the purposes of preventing further degradation of the building.

The following preservation and restoration work is considered critical to prevent further deterioration of the building and to ensure its longevity:

Sensitive Removal of Vegetation Throughout Roof Structure and Surroundings.
 The nature of masonry construction is porous and prone to retaining moisture that plants find inviting to grow in. Extensive root systems deep in the masonry construction are expected to be found judging from photographs showing the size of the plant growth

that has occurred on its roof. Careful & selective removal of the vegetation is required to prevent damage to the masonry and roof.

A LARGE OAK IS LOCATED BEHIND (NORTH) OF THE HOLDING CELL. IT IS SHOWING SOME DECAY, AND WILL NEED REVIEW & SOME TRIMMING TO PREVENT DEAD BRANCHES FALLING ON THE HOLDING CELL.

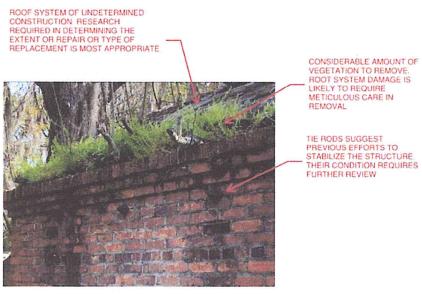

CONSIDERABLE AMOUNT OF VEGETATION TO REMOVE. ROOT SYSTEM DAMAGE IS LIKELY TO REQUIRE METICULOUS CARE IN REMOVAL

#### 1. SOUTH ELEVATION ROOF DETAIL

#### 2) Roof Repair and Roof Assembly Research & Detailing.

The roof construction is currently unknown and requires investigation and research into what it's original construction would have been, to what extent replacement is needed, and what kind of replacement is the most suitable in both preventing moisture intrusion into the masonry walls, and what roof construction & detailing best reflects it's original construction. Full replacement may be necessary judging from the amount of vegetative growth with the highest priority being the prevention of further moisture infiltration into the masonry wall assembly. Limiting the amount of moisture in the walls will discourage future plant growth, mildew and efflorescence that is currently present.

The barrel vault roof is structurally prone to spreading over time. Existing structural tie-rods are visible on the exterior suggesting past interventions to prevent the barrel vault roof from pushing the sidewalls out over time. Structural review is required.

2. EAST ELEVATION ROOF CORNICE DETAIL

A NEIGHBORING RESIDENTIAL HOME TO THE NORTH OF THE PROPERTY REQUIRES LANDSCAPE BUFFERING TO PROVIDE THE RESIDENTS PRIVACY FROM THE PUBLIC & TO PROVIDE A NEUTRAL BACKGROUND SETTING FOR THE HISTORIC HOLDING CELL.

A MATURE OAK TREE
COVERED IN SPANISH MOSS
AND WITH SOME VISIBLE
DECAY ADDS TO THE
HISTORICAL AMBIENCE OF
THE SITE. SOME SELECTIVE
TRIMMING FOR AESTHETICS
AND SAFETY, IS LIKELY TO BE
REQUIRED AFTER A REVIEW
OF IT'S CONDITION.

MILDEW & EFFLORESCENCE INDICATE EXCESSIVE MOISTURE INFILTRATION INTO THE MASONRY STRUCTURE. ROOF REPAIR FOR MOISTURE CONTROL AND CLEANING OF THE WALLS ARE NEEDED.

REMOVAL OF VEGETATION AND SURROUNDING THE STRUCTURE WITH A LANDSCAPE BARRIER & GRAVEL IS RECOMMENDED

#### 3. EAST ELEVATION

3) Stabilize Wrought Iron Gates & Window Gratings & Condition Review.

The iron gates and window gratings are a significant part of conveying the building's purpose and history. It is recommended that further corrosion is prevented with a corrosion inhibitor. The gates and grates may require additional hardware to ensure the building can be secured to prevent unwanted occupants and vandalism. The operational condition of the gates are to be reviewed and will determine if they are best kept permanently closed or suitable for occasional operation for chaperoned entry by the public.

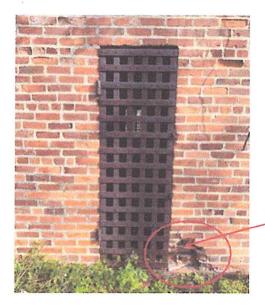

VEGETATION REMOVAL AND ROOF REPAIR REQUIRE TO PREVENT ROOT & MOISTURE DAMAGE

IRON GRATINGS APPEAR TO BE IN RELATIVELY GOOD CONDITION AND WILL NEED SOME SABILIZATION TO PREVENT FURTHER CORROSION.

MASONRY CLEANING REQUIRED THROUGHOUT

4. NORTH ELEVATION

DAMAGE TO THE MASONRY STRUCTURE IS VISIBLE AND REQUIRES FURTHER REVIEW FOR EVALUATION FOR RISK OF FURTHER COLLAPSE. IF THE RISK OF FURTHER DETERIORATION IS MINIMAL, NO FURTHER REPAIR IS SUGGESTED TO ALLOW THE STRUCTURE TO SHOW IT'S AGE AND CONSTRUCTION.

IRON GATES APPEAR TO BE IN RELATIVELY GOOD CONDITION AND WILL NEED SOME SABILIZATION TO PREVENT FURTHER CORROSION.

A LEAN-TO WOOD SHED STRUCTURE EXISTS ON THE EAST SIDE. THIS REQUIRES RESEARCH INTO ITS ORIGINS & PURPOSE TO DETERMINE IF REMOVAL IS APPROPRIATE. EXTENSIVE VEGETATION REMOVAL IS REQUIRED FOR THIS STRUCTURE.

#### 5. SOUTH ELEVATION

- 4) Review of Lean-to Shed for Possible Removal or Restoration A shed on the east side of the building is of undetermined origin and heavily overgrown with vegetation. Removal of the vegetation is required, and some research into its origins is needed to determine if it has enough historical value to remain or to be removed.
- 5) Interior Condition Review
  The interior contents and condition of the holding cell are currently unknown and will need further investigation to determine if there is anything of historic value to be preserved. Cleaning of the interior, such as soil removal, may uncover artifacts of historic value and an experienced cultural heritage specialist is recommend to review its contents and surroundings for artifacts of historic value.

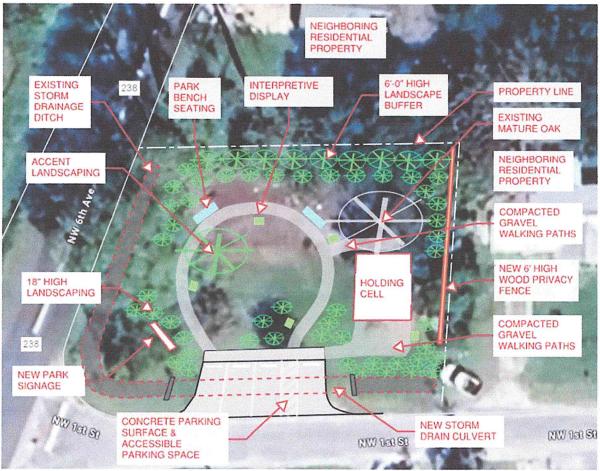

#### **Recommended Enhancements**

#### 1) Addition of defined parking spaces

No well-defined parking spaces or pathways exist. This property has been privately owned and has only recently been donated to the Town of Lake Butler for public use. Accessibility requirements for public facilities requires the provision of ADA parking and an accessible path to all the main functions of the facility.

Due to the relatively small nature of the site, only a few parking spaces are necessary. If acceptable to the city, the parking is proposed to be right-angled parking spaces directly off of NW 1st St. This configuration maximizes the land use of the property for amenity features other than parking.

A drainage ditch runs along both adjacent roads, so the installation of a drainage culvert under the parking is required. Separating the storm drainage from the parking surface facilitates achieving the level grading required for accessible parking stalls and pathway connections.

#### 6. Recommended Site Design Elements

#### 2) Addition of Hardscape Pathways

An accessible hardscape path is recommended from the parking to both ends (North & South) of the holding cell to allow visitors to see inside the building through its windows.

Historic buildings are best situated in a park setting that provides a neutral background. A walking path around the property is recommended with occasional bench seating.

#### 3) Park Signage & Town Heritage Site Identification

Signage is recommended to signify the public nature of the property and its historic value. A park sign is recommended to be located at the Southwest corner of the property facing northbound traffic on NW 6<sup>th</sup> Avenue where it is most likely to be visible from W Main St one block south and is the town's main throughfare.

Architectural consulting is recommended for overseeing the signage design and overall site design.

HOLDING CELL BUILDING NEW PRIVACY FENCE

NEW PARK SIGNAGE

**NEW PARKING** 

#### 7. Park Streetview with New Signage & Parking

#### 4) Exterior & Interior Interpretative Displays

Outdoor interpretive signage highlighting Lake Butler's local his tory in addition to the holding cell's history is recommended along the park pathway and possibly inside the holding cell in a way that they can be visible from the exterior through the windows and doorways without entry. Until the interior condition and gate operation condition of the holding cell is reviewed, it is recommended that the openings be secured without public entry.

An Historical Resources professional will be required to research local history, generate content and curate the acquisition of relevant images and/or artifacts for display. Graphic design services will also be required for the design of the displays.

#### 5) Fencing & Landscape Buffering

Neighboring residential properties to the North and East necessitate some visual separation for resident privacy from the public, as well as providing a visual & aesthetic separation of the historic building from the more contemporary buildings surrounding it. A landscape buffer is recommended along the north property line to provide a neutral backdrop for the historic building. Native species of trees and shrubs are recommended (cabbage palms, pines, oaks, wax myrtles, Simpson stopper, saw palmetto, ferns, coontie palms etc). Removal of Spanish moss from existing trees is discouraged as is the removal of mature trees with aesthetic value.

Due to space constraints along the East property line, a minimum 6' high wood or brick fence is recommended in combination of selective removal of existing vegetation. Both brick and wood are both building materials in keeping with the building materials used in same time period as the holding cell. PVC fencing and other contemporary fencing materials are not to be used.

While all forms of harassment are prohibited, it is the City's policy to emphasize that sexual harassment is specifically prohibited. It is the responsibility of the Department Head to maintain a workplace free of any form of sexual harassment. - 6. Three days of bereavement leave may be granted for the death of a member of the employee's immediate family. This leave will not be charged to accrued sick or annual leave but shall be in addition thereto. - 7. Upon separation of employment, the employee shall be paid for one-fourth (25%) of all accumulated sick leave at the employee's regular hourly rate of pay up to a maximum of 1,500 hours. - The City may continue to pay premiums to continue to cover the employee under its life insurance plans through the month following the beginning of the leave. Thereafter, employees on leave may continue their benefits under the Cities supplemental plans provided the employee pays the entire monthly premiums during the leave. Employees who wish to continue their insurance coverage should check with the City's payroll department before beginning their leave.
- 3. Because operations sometimes require that vacant positions be filled, a personal leave of absence does not guarantee that the job will be available when the employee returns from a leave. An effort, however, will be made to place employees in their previous position or a comparable job which they are qualified to perform. If no such position is available, an employee may be eligible for rehire and/or reappointment as a new employee if they apply for an available position for which they are qualified for, and prior work history warrants rehire.

If an employee voluntarily or upon request by the City of Lake Butler, prior to a workplace accident, seeks medical treatment or rehabilitation for substance abuse, the City Manager will grant that employee a one-time medical leave of absence for treatment. An employee request for medical treatment or rehabilitation will only be considered prior to an accident. During such a time as an individual is enrolled in a rehabilitation program, the City of Lake Butler shall attempt to maintain a position for that employee, upon his/her successful completion of the program. However, the City of Lake Butler in no way guarantees that any employee, upon returning from the successful

completion of a drug/alcohol rehabilitation program, shall have any employment position provided to him/her. Moreover, in the event that an employment position is available, the City does not guarantee that the rate of pay for that position will be equal to that previously received prior to the employee's suspension and enrollment in a rehabilitation program.

The penalty for violation of the City Substance Abuse Policy will include termination of employment or some other form of discipline which the City, in its discretion, deems appropriate.

### TYPES OF TESTING

The City of Lake Butler reserves the right to conduct the following types of testing for drug and alcohol, as defined in this Policy:

1. Job Applicant Testing, The City requires all individuals hired by the city to be free of alcohol and controlled substances. All individuals who are extended a conditional offer of employment will be required to submit to a drug screen prior to commencement of employment. Furthermore, no applicant (or employee seeking transfer to a new job position) will be allowed to perform any safety-sensitive function until the test results have been obtained and it has been determined that the test results for controlled substances yield a negative result. If a job applicant will not be allowed to perform safety-sensitive functions for a period of not less than 24 hours following administration of the test.

Refusal to submit to a post-offer, pre-employment drug test shall constitute a basis for City's refusal to hire that individual. All job applicants' prospects of employment with The City of Lake Butler will be conditioned upon their being qualified for work. Any job applicant who tests positive for a controlled substance will not be considered qualified for employment with City.

- a. All employment candidates shall be-provided notice of the test and assurance that highly reliable testing procedures will be used. Prior to and after testing, applicants are given an opportunity to confidentially report to a Medical Review Officer the use of any prescription or non-prescription medicines which may alter their test results. Additionally, applicants may consult with a Medical Review Officer for any further technical information regarding such medications.
- b. The results of the laboratory test shall be restricted to whether or not the applicant's specimen tested positive for alcohol and/or controlled substance, the particular substance involved, and the amount found within the specimen tested.
- 2. **Current Employee Testing,** in addition to the above post-offer, pre-employment testing, The City will utilize the following categories of employment related testing for its employees:

- a. <u>Routine Fitness For Duty Testing</u>, The City of Lake Butler will require all of its employees to submit to drug testing which is conducted as part of a routinely scheduled employee fitness for duty medical examination where the testing is determined to be job-related and consistent with business necessity.
- b. <u>Reasonable Suspicion Testing.</u> The city will require all of its employees to submit to a controlled substances test whenever there is reasonable suspicion to believe that an employee is under the influence of controlled substances. Reasonable suspicion requires articulable belief by management that an employee possesses or uses controlled substances at the workplace and is either intoxicated or impaired by such substances. The employer's determination that reasonable suspicion exists must be based upon specific, contemporaneous, articulable observations concerning the appearance, behavior, speech, or body odors of the employee. The observations may include indications of the chronic and withdrawal effects of controlled substances.
  - i. The standard for reasonable suspicion testing does not require an overwhelming burden of proof. Generally, where supervisors can reasonably conclude that there are objective facts indicative of the use of prohibited substance there is sufficient justification for testing. Among other things, such as facts and inferences may be based upon:
  - ii. Observable phenomena while at work, such as direct observation of drug or alcohol use or of the physical symptoms or manifestations of being under the influence of drugs.
  - iii. Abnormal conduct or erratic behavior while at work or a significant deterioration in work performance.
  - iv. A report of drug use, provided by a reliable and credible source.
  - v. Evidence that an individual has tampered with a drug test during his employment with the City of Lake Butler.
  - vi. Information that an employee has caused, contributed to, or been involved in an accident while at work.
  - vii. Evidence that an employee has used, possessed, sold solicited, or transferred drugs or alcohol while working or while on City premises or while operating City equipment, vehicles or machinery.
  - viii. The City has the right to search lockers, handbags, lunch boxes, or other containers at any time provided there is reasonable suspicion to believe that an employee possesses or is under the influence of drugs. An employee's refusal to cooperate with a search will be treated as serious insubordination that warrants immediate discipline up to and including discharge.

- 3. <u>Post-Accident Testing-</u> Normally, the city will require substance abuse testing for any employee involved in an accident while on duty, whether on or off the city premises. An accident does not just have to involve a vehicle. It could be self-injury or unexplained damage to equipment or property.
  - i. If an employee has a vehicular accident while operating one of the City's vehicles, that employee must be tested for controlled substances as soon as practicable if the accident involves the loss of human life, or if the driver receives a citation under state or local law for moving traffic violation arising from the accident.
  - ii. Due to the fact that the City's concern for its workforce is paramount, it may be necessary to administer appropriate medical treatment prior to obtaining specimens for post-accident testing. If the required specimens can be obtained at a medical treatment facility which is not a designated collection site, a physician's assistant, registered nurse, nurse practitioner, licensed practical nurse, certified paramedic, or licensed collection site person may collect the specimen. If such an individual is not present, the injured employee, as soon as is medically permissible, shall be transported to a designated collection site to produce the required specimens.
  - iii. All employees who are subject to post-accident testing shall remain readily available for such testing unless medically unable to do so. If they do not remain available for such testing, they will be deemed to have refused to submit for testing, as provided herein. As stated above, nothing in this Policy shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a driver from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.
- 4. <u>Random Testing-</u> The City reserves the right to conduct random substance abuse testing on any or all of its employees engaged in safety sensitive positions at any time without prior notice.
  - a. All random tests conducted under this provision will be unannounced. The dates for administering random controlled substance tests will be spread reasonably throughout the calendar year.
- 5. <u>Return-to- Duty Testing-</u> Any covered employee who has engaged in prohibited conduct, as explained in this Policy, and who has not been terminated from employment as provided herein, shall before returning to duty, undergo a return-to-duty controlled substance test. Substance test must be negative in order to resume employment.
- 6. <u>Follow-Up Testing-</u> If the City, in its sole discretion, determines that an employee who has submitted confirmed test results which register positive for content of one or more controlled substances (including alcohol), should not be terminated, the employee may be granted a one (1) time leave of

absence without pay and be required to enroll in and successfully complete a drug and/or alcohol rehabilitation program as a condition of returning to work. The city will designate the drug and/or alcohol rehabilitation program which must be attended by the employee.

Should the City elect such an option for an employee the employee who successfully completes a rehabilitation program, upon returning to work (if a position is available), shall be initially subject to return-to-duty testing as provided above, and shall thereafter be subject to unannounced follow-up testing for controlled substance as deemed appropriate, provided that no less than six (6) follow-up tests must be conducted upon the employee within the first twelve (12) months following the employee's return to duty. Before being allowed to return to work, this employee must be evaluated by a substance abuse professional to determine if the employee has properly adhered to and completed a rehabilitation program. The cost of this evaluation shall be borne by the employee. Follow-up testing may be continued for a period of up to sixty (60) months from the date of the employee's return-to-duty.

### **REFUSAL TO SUBMIT TO TESTING**

If an injured employee refuses to submit to testing, the employee forfeits eligibility for workers' compensation medical and indemnity benefits. Additionally, an employee, whether injured or uninjured, who refuses to submit to testing may be disciplined, up to and including discharge. A job applicant who refuses to submit to a post offer pre-employment drug test will not be hired by the city. Individuals who refuse to submit to testing will be asked to sign a Refusal to Submit Breath/Blood/Urine Form. If an employee performing safety-sensitive functions refuses to submit to testing, the individual shall immediately be removed from safety-sensitive functions until testing can be completed.

Any employee unable to provide a sample will be deemed to have refused to submit to testing. Upon the recommendation of the City's certified health care laboratory, the employee will be allowed a two-hour period with eight ounces of water per thirty minutes in order to provide the sample.

### SPECIMEN COLLECTION AND LABORATORY PROCEDURES

The City is committed to following strict specimen collection and laboratory testing procedures to ensure the quality, integrity and authenticity of the specimen. Employees and job applicants have a right to consult a Medical Review Officer for technical information regarding prescription and non- prescription medication. Further, employees and job applicants will be allowed to confidentially report the use of prescription and non-prescription medications to a Medical Review Officer before and after being tested on forms to be provided.

Collection site security and specimen collection are unequivocally the responsibility of the collection site and its personnel. The City assumes no responsibility for specimen collection or transmittal errors incurred by either the collection site, the laboratory or their respective staffs. The City will pay the cost of all initial and confirmation substance abuse screening it requires from either its applicants or employees. However, all costs of additional non-required testing and testing incurred during a rehabilitation period or program shall be borne by the employee.

In addition, employees found to have engaged in conduct in violation of the Policy who are not discharged will be removed immediately from the performance of all safety-sensitive functions and will not in no event be allowed to resume the performance of safety-sensitive functions unless and/or until the employee has successfully undergone return-to-duty and follow-up testing as provided herein.

Notwithstanding the City's right to exercise direction, any employee who submits a specimen registering a confirmed positive test result should assume that his/her employment shall be terminated unless otherwise notified by the City. Further, such an impaired employee forfeits his/her eligibility for medical and indemnity benefits under Florida's Workers' Compensation Act.

Both job applicant and current employee testing procedures shall provide for a second, confirmation test of the remaining portion of an applicant/employee's initially tested specimen in the event that the results of that individual's initial substance abuse test register a positive result. The City will require that a confirmation test be conducted upon all employees registering a positive result prior to initiating any course of disciplinary action against the specimen provider relating to the results of said same initial screening test.

### CHALLENGES TO TEST RESULTS

Within five (5) working days after receiving written notice of a positive confirmed test result, all employees or applicants may contest or explain the result to a Medical Review Officer. ### 3. Policy

The City of Lake Butler is committed to building a strong cybersecurity program to support, maintain, and secure critical infrastructure and data systems. In order to achieve this, the city will identify, evaluate, and take steps to avoid or mitigate risk to the City's information assets and prevent unauthorized digital or physical access, damage, theft, compromise, or interference to the City's information systems and facilities. These steps include implementing and operating controls to manage the City's information security risks and ensuring that all users of information assets are aware of their responsibilities in protecting those assets while complying with all applicable federal, state, or other regulations.

### 4. Responsibilities

Roles and responsibilities must be separated so that a single individual, account, or function cannot intentionally

# **Personnel Policy**

or unintentionally subvert a critical process. Controls must also be put in place so that no single person can access, modify, or use assets without authorization or detection.

Achieving and maintaining cybersecurity is a shared responsibility. City Manager will ensure that a written Cybersecurity Policy is implemented, reviewed and updated on a periodic basis; including providing training and updates to City staff; confirm identification, acquisition, and implementation of information system software and hardware; identify locations where Personally Identifiable Information (PII) is stored and accessible; provide input for who should have access to PII and with what types of privileges or access rights, performing periodic classification assessments and ensuring regular reviews to update and manage changes to risk; assess system vulnerabilities and implement security tools and safeguards for protecting PII; ensure implementation, enforcement, and effectiveness of IT Security policies and procedures; plan, execute, and lead security audits across the City; facilitate an understanding and awareness that security requires participation and support at all organizational levels; and oversee daily activities and use of information systems to ensure employees, business partners, and contractors adhere to these policies and procedures.

Under the direction of the City Manager, the Information Technology Contractor will help implement and enforce the items outlined in this policy. They will manage logs and events of all systems, utilizing a SIEM (Security Information and Event Management) system, and conduct periodic reviews to ensure our cybersecurity.

All users, including employees, elected officials, contractors, must comply with all aspects of this policy. Users are responsible for the acceptable use and security of infrastructure and data.

### 5. Standards

### 5.1 Asset Management

An inventory of all approved hardware and software on the city network and systems will be maintained that documents the following:

- The employee in possession of the hardware or software
- Date of purchase
- · Serial number
- · Type of device and description
- For licensed software:# of licenses, license renewal date(s), other restrictions, etc.

## 5.2 Personally Identifiable Information (PII)

An inventory of all current PII information by type and location will be maintained. The following table will be used to inventory PII.

Location	PII by type	Essential	Location	Owner
Website				
Contractors				
File in a staff office				
File in building				
File offsite				
Desktop				
HR System				
Financial System				
Laptop				
Flash drive				
Cell phones				
Tablets				
Other				

The Florida Identity Theft Protection Laws prohibits anyone (individual, private or public corporation, or business) who maintains Social Security numbers from:

- Printing a consumer's SSN on any mailed materials not requested by the consumer unless redacted
- Printing a consumer's SSN on a card used by the consumer that is required to access products or services
- Publicly posting or displaying a consumer's SSN, such as on a website

# 5.3 Identity Management, Authentication and Access Control

Information Technology Contractor is responsible for ensuring that access to the City's systems and data is appropriately controlled. All systems housing City data (including laptops, desktops, tablets, and cell phones) are required to be protected with a password or other form of authentication. Except for the instances noted in this policy, users with access to the City systems and data shall not share passwords

2023-2024

with anyone.

The City has established the following password configuration requirements for all systems and applications (where applicable):

- Minimum password length: 8 characters
- · Password complexity: use a passphrase rather than a password
- Prohibited reuse for six (6) iterations
- Changed periodically (every 180 days)
- Invalid login attempts set to lock after three

Employees are encouraged to follow further safeguards such as:

- · Not allowing PII on mobile storage media
- · Utilizing Locking file cabinets
- Not allowing PII left on desktops
- Encrypting sensitive files on computers
- Requiring password protection
- Enabling multi-factor authentication
- Following the record retention plan and destroying records no longer required

Where possible, multi-factor authentication will be used when users authenticate to the City's systems.

- Users are granted access only to the system data and functionality necessary for their job responsibilities.
- Privileged and administrative access is limited to authorized users who require escalated access for their job responsibilities and where possible will have two accounts: one for administrator functions and a standard account for day-to-day activities.
- All user access requests must be approved by the Information Technology Contractor.
- Information Technology Contractor shall make sure all system access is removed of all users who separate from the City within 48 hours.

On an annual basis, a review of user access will be conducted by the departments under the direction of the Information Technology Contractor to confirm compliance with the access control policies outlined above.

2023-2024

### **Personnel Policy**

#### 5.4 Awareness and Training

City staff are required to complete City assigned security training:

- 1. Upon hire and within 30 days of receiving login credentials
- 2. Annually

On an annual basis, the IT Contractor will conduct email phishing exercises of its users. The purpose of these tests is to help educate users on common phishing scenarios. It will assess the level of awareness and comprehension of phishing, understanding, and compliance with policy around safe handling of emails containing links and/or attachments, and the ability to recognize a questionable or fraudulent message.

#### 5.5 Data Security

#### 5.5.1 Data Classification

Users must adhere to the Records Retention Policy regarding the storage and destruction of data. Data residing on City's systems must be continually evaluated and classified into the following categories:

- **Users' Personal Use:** Includes individual user's personal data, emails, documents, etc. This policy does not apply to a user's personal information.
- Marketing or Informational Material: Includes already-released marketing material, commonly known information, data freely available to the public, etc. and this policy does not apply.
- Operational: Includes data for basic organizational operations, communications with vendors, employees, etc. (non-confidential). The majority of data will fall into this category.
- **Confidential:** Any information deemed confidential. The following list provides guidelines on what type of information is typically considered confidential. Confidential data may include:
  - Employee or customer Social Security numbers or personally identifiable information (PII)
  - o Personnel files
  - Protected Health Information (PHI)
  - Network diagrams and security configurations
  - Privileged communications regarding legal matters

- o Any confidential data held for a third party (be sure to adhere to any confidential data agreement covering such information)

#### 5.5.2 Data Storage

The following guidelines apply to storage of the different types of organizational data.

- Operational: Operational data should be stored on a server that gets the most frequent backups.
   Some type of system- or disk-level redundancy is encouraged.
- Confidential: Confidential information must be removed from desks, computer screens, and common areas unless it is currently in use. Confidential information should be stored under lock and key (or keycard/keypad), with the key, keycard or code secured.

#### 5.5.3 Data Transmission

The following guidelines apply to the transmission of the different types of organizational data.

• Confidential: Confidential data shall not be 1) Transmitted outside the City's network without the use of strong encryption 2) Left on voicemail systems, either inside or outside the organization's network. 3) Transmitted via email, outside of the organization's network.

Data while transmitted, includes any data sent across the City's network or any data sent to or from a City-owned or City-provided system. Types of transmitted data that shall be encrypted include:

- VPN tunnels
- Remote access sessions
- Web applications
- Email and email attachments
- Remote desktop access
- Communications with applications/databases

# 5.5.4 Data Destruction

Employees must follow the State's and City's records retention policy and procedures before destroying any

### **Personnel Policy**

data.

- Confidential: Confidential data must be destroyed in a manner that makes recovery of the information impossible. The following guidelines apply to data located on City-owned or City-provided systems, devices, media, etc.:
  - O Storage media (CD's, DVD's): Physical destruction is required, some shredders may be able to perform this function.
  - O Hard drives/systems/mobile storage media: At a minimum, DoD three (3) pass data wiping must be used. Simply reformatting a drive does not make the data unrecoverable. If wiping is used, the City shall use the most secure commercially- available methods for data wiping. Alternatively, the city may physically destroy the storage media.

#### 5.5.5 Data Storage

Stored Data includes any data located on City-owned or City-provided systems, devices, media, etc.

Examples of encryption options for stored data include:

- Whole disk encryption
- Encryption of partitions/files
- Encryption of disk drives
- Encryption of personal storage media/USB drives
- Encryption of backups
- Encryption of data generated by applications

#### 6. Information Protection Processes and Procedures

#### **6.1** Secure Software Development

Where applicable, all software development activities performed by City or by vendors on behalf of the organization shall employ secure coding practices including those outlined below.

A minimum of 2 software environments for the development of software systems should be available - development/training and a production environment. Software developers or programmers are required to

develop in the development/training environment and promote objects into the production environments.

### **Personnel Policy**

The development/training environment is used for assurance testing by the end-user and the developer. The production environment should be used solely by the end-user for production data and applications. Compiling objects and the source code is not allowed in the production environment.

#### **Contingency Planning**

The City's business contingency capability is based upon cloud and local backups of all critical business data. This critical data is defined as "the data that is critical to successful organization operation". Full data backups will be performed on a daily basis. Confirmation that backups were performed successfully will be conducted daily. Testing of cloud backups and restoration capability will be performed on a monthly basis.

During a contingency event, all IT decisions and activities will be coordinated through and under the direction of the City Manager.

The following are some examples of possible business contingency scenario procedures:

- In the event that one or more of City's systems or applications are deemed corrupted or inaccessible, the Information Technology Contractor will work with the respective vendor(s) to restore data from the most recent cloud and local backup and, if necessary, acquire replacement hardware.
- In the event that the location housing the city systems are no longer accessible, the Information Technology Manager will work with the respective vendor(s) to acquire any necessary replacement hardware and software, implement these at one of the City's other sites, and restore data from the most recent cloud, off-site, or local backup.

#### 6.2 Network Infrastructure

The city will protect its electronic communications network from the Internet by utilizing a firewall. For maximum protection, the network devices shall meet the following configuration standards:

- Vendor recommended, and industry standard configurations will be used.
- Changes to firewall and router configuration will be approved by Information Technology Contractor.
- Both router and firewall passwords shall be secured and difficult to guess.
- The default policy for the firewall for handling inbound traffic shall be to block all packets and connections unless the traffic type and connections have been specifically permitted.
- Inbound traffic containing ICMP {Internet Control Message Protocol) traffic shall not be passed in from the Internet, or from any un-trusted external network.

# **Personnel Policy**

- All web services running on routers shall be disabled.
  - Simple Network Management Protocol (SNMP) Community Strings shall be made (changed from the default "public") "private".

#### **6.3 Network Servers**

Servers typically accept connections from several sources, both internal and external. As a general rule, the more sources that connect to a system, the more risk associated with that system, so it is particularly important to secure network servers.

- Unnecessary files, services, and ports shall be removed or blocked. If possible, a server- hardening guide, which is available from the leading operating system manufacturers, shall be followed.
- Network servers, even those meant to accept public connections, shall be protected by a firewall or access control list.
- When possible, a standard installation process shall be developed for the City's network servers. A standard process will provide consistency across servers no matter which employee or contractor handles the installation.
- Clocks on network servers shall be synchronized with the City's other networking hardware using NTP or another means. Among other benefits, this will aid in problem resolution and security incident investigation.

#### 6.4 Network Segmentation

Network segmentation is used to limit access to data within the City network based upon data sensitivity. The City maintains two wireless networks. The *guest/public* wireless network will grant the user internet access only. Access to the *secure* wireless network is limited to the City staff and devices, and provides the user access to the intranet.

Under the direction of the Information Technology Contractor, a third-party network administrator manages the network user accounts, monitors firewall logs, and operating system event logs. The Information Technology Manager authorizes vendor access to the system components as required for maintenance.

#### 7. Protective Technology

#### 7.1 Email Filtering

The City shall filter email, at a minimum of, the Internet gateway and/or the mail server. This filtering will

# **Personnel Policy**

help reduce spam, viruses, or other messages that may be deemed either contrary to this policy or a potential risk to the City's IT security.

Additionally, email or anti-malware programs may be implemented to identify and quarantine emails that are deemed suspicious.

#### 7.2 Internet Filtering

The IT Department shall block access to internet websites and protocols that are deemed inappropriate or pose a security risk. Some examples of blocked categories are adult/sexually explicit material, advertisements, hacking, violence and hate content.

#### 7.3 Network Vulnerability Assessments

On a quarterly basis, the IT Contractor will perform both internal and external network vulnerability assessments. The purpose of these assessments is to establish a comprehensive view of the organization's network as it appears internally and externally. These evaluations will be conducted under the direction of Information Technology Manager to identify weaknesses with the network configuration that could allow unauthorized and/or unsuspected access to

the organization's data and systems.

In addition, annual penetration testing will be run to identify weaknesses or vulnerabilities that will need to be addressed.

#### 8. Anomalies and Events

The following logging activities are conducted by IT System Contractor under the direction of the City Manager:

- Domain Controllers Active Directory event logs will be configured to log the following security events: account creation, escalation of privileges, login failures, and excessive repeated login attempts.
- Application Servers Logs from application servers (e.g., web, email, database servers) will be configured to log the following events: errors, faults, login failures, and excessive repeated login attempts.
- Network Devices Logs from network devices (e.g., firewalls, network switches, routers) will be configured to log the following events: errors, faults, login failures, and excessive repeated login attempts.

2023-2024

# **Personnel Policy**

Passwords should not be contained in logs.

Logs of the above events will be reviewed by the IT System Contractor, utilizing a SIEM (Security Information and Event Management), at least once per month. Event logs will be configured to maintain record of the above events for at least three months.

#### 9. Security Continuous Monitoring

#### 9.1 Anti-Malware Tools

All City servers and workstations shall utilize endpoint protection software to protect systems from malware and viruses. Real-time scanning will be enabled on all systems and weekly malware scans will be performed. A monthly review of the endpoint protection software

dashboard will be conducted by IT System Contractor to confirm the status of virus definition updates and scans.

#### 9.2 Patch management

All software updates and patches will be distributed to all City systems as follows:

- Workstations shall be configured to install software updates every night automatically.
- Server software updates shall be manually installed at least quarterly.
- Any exceptions shall be documented.

#### 10. Response Planning

The City's annual security awareness training shall include direction and guidance for the types of security incidents users could encounter, what actions to take when an incident is suspected, and who is responsible for responding to an incident. A security incident, as it relates to the City's information assets, can be defined as either an Electronic or Physical Incident.

Information Technology Contractor is responsible for coordinating all activities during a significant incident, including notification and communication activities and the chain of escalation and deciding if/when outside agencies, need to be contacted.

#### 10.1 Electronic Incidents

This type of incident can range from an attacker or user accessing the network for unauthorized/malicious purposes to a virus outbreak or a suspected Trojan or malware infection. When an electronic incident is suspected, the steps below should be taken in order.

# **Personnel Policy**

- 1. Remove the compromised device from the network by unplugging or disabling network connection. Do not power down the machine.
- 2. Report the incident to the IT System Contractor or City Manager.
- 3. Contact the third-party service provider (and/or computer forensic specialist) as needed.

The remaining steps should be conducted with the assistance of the third-party IT service provider and/or computer forensics specialist.

- 4. Disable the compromised account(s) as appropriate.
